Not everyone is a friend of the manifold abbreviations that have by now become a part of the scientific language of medicine. In order to avoid misunderstanding these abbreviations, it is wise to refer to a reliable dictionary, such as this one prepared by Heister. The abbreviation ED means, for instance, effective dose to the pharmacologist. However, it might also stand for emetic dose. Radiologists use the same abbreviation for erythema dose, and ED could also mean ethyl dichlorarsine. A common meaning of ECU is European currency unit, a meaning that might not be very often in scientific medical publications. ECU, however, also means environmental control unit or European Chiropractic Union. Hopefully, those making inventions and discoveries will make use of Heister's dictionary before creating new abbreviations when preparing manuscripts for scientific publications. It is a very worthwhile goal not to use the same abbreviation for several different terms, especially if it is already widely accepted to mean only one of them. It may be impossible, however, to achieve this goal in different scientific disciplines. Therefore, although it is wise for the abbreviations used in a publication to be defined, it is also very helpful for readers and writers to use a dictionary such as this one. The author deserves our warmest thanks since we know that compiling such a comprehensive dictionary is based upon incredibly hard effort.

Drawing together a wealth of primary sources, J.A. Sokalski examines the aims, inventions, and methods of the pictorial style that defined MacKaye's art. Sokalski shows how MacKaye's famous Madison Square Theatre, which featured a double stage reminiscent of an elevator, created whirling pictorial illusions for fashionable New York. He argues that MacKaye's infamous failure, the colossal Spectatorium theatre for the 1893 Chicago World's Fair, was the most complete realization of this illusionary aesthetic. Sokalski also explores MacKaye's influence on Buffalo Bill Cody and how civil war cycloramas expanded his concept of pictorial space.

This novel, set mainly in St. Louis Missouri (tho' occasionally in outer space), tries to capture the romantic lives of young people today. Boys date boys, girls girls, along with the (somewhat more prevalent) girls and boys. The book explores the often fluid nature of one's sexual

identity and preferences and how they can affect one's romantic commitments. Some key scenes play out in several of the St. Louis region's historic events and institutions-Lewis and Clark's exploration, the 1904 World's Fair, Cardinal baseball. Another site is Washington University. That educational setting offers the chance to trace the fascinating ways in which ideas are planted, take hold, and then spread far and wide. Above all, *Modified Raptures* dramatizes in detail the ways time's irresistible demands can shape (or doom) human relationships, careers and lives.

The Glossary for Transport Statistics was published for the first time in 1994 with the purpose of assisting member countries during the collection of data on transport using the Common Questionnaire developed by the United Nations Economic ...

Dostoevsky's letter to Katkov reveals his immediate inspiration, to which he remained faithful even after his original plan evolved into a much more ambitious creation: the desire to counter what he considered dire consequences stemming from the doctrines of Russian nihilism. In the novel, Dostoevsky pointed out the dangers of both utilitarianism and rationalism, whose main ideas inspired the radicals, continuing with a fierce criticism that he had already begun with his *Notes on the Underground*. Dostoevsky used the characters, dialogue, and narrative of *Crime and Punishment* to articulate an argument against Westernization ideas. He thus attacked a peculiar Russian mixture of French utopian socialism and Benthamite utilitarianism, which had developed under revolutionary thinkers such as Nikolai Chernyshevsky and became known as rational egoism. The radicals refused to recognize themselves on the pages of the novel, as Dostoevsky pursued nihilistic ideas to their most extreme consequences. Dimitri Pisarev ridiculed the idea that the ideas of Raskolnikov could be identified with those of the radicals of the time. The radicals' goals were altruistic and humanitarian, but they had to be achieved by relying on reason and repressing the spontaneous flow of Christian compassion. Chernyshevsky's utilitarian ethic proposed that thought and will in man were subject to the laws of physical science. Dostoevsky believed that such ideas limited man to a product of physics, chemistry, and biology, denying spontaneous emotional responses. In the latest version of it, Russian nihilism encouraged the creation of an elite of superior individuals to whom the hopes of the future would be entrusted.
