Teaching Professional and Technical Communication guides new instructors in teaching professional and technical communication (PTC). The essays in this volume provide theoretical and applied discussions about the teaching of this diverse subject, including relevant pedagogical approaches, how to apply practical aspects of PTC theory, and how to design assignments. This practicum features chapters by prominent PTC scholars and teachers on rhetoric, style, ethics, design, usability, genre, and other central concerns of PTC programs. Each chapter includes a scenario or personal narrative of teaching a particular topic, provides a theoretical basis for interpreting the narrative, illustrates the practical aspects of the approach, describes relevant assignments, and presents a list of questions to prompt pedagogical discussions. Teaching Professional and Technical Communication is not a compendium of best practices but instead offers a practical collection of rich, detailed narratives that show inexperienced PTC instructors how to work most effectively in the classroom. Contributors: Pam Estes Brewer, Eva Brumberger, Dave Clark, Paul Dombrowski, James M. Dubinsky, Peter S. England, David K. Farkas, Brent Henze, Tharon W. Howard, Dan Jones, Karla Saari Kitalong, Traci Nathans-Kelly, Christine G. Nicometo, Kirk St Amant

Content Strategy in Technical Communication provides a balanced, comprehensive overview of the current state of content strategy within the field of technical communication while showcasing groundbreaking work in the field. Emerging technologies such as content management systems, social media platforms, open source information architectures, and application programming interfaces provide new opportunities for the creation, publication, and delivery of content. Technical communicators are now sometimes responsible for such diverse roles as content management, content auditing, and search engine optimization. At the same time, we are seeing remarkable growth in jobs devoted to these other content-centric skills. This book provides a roadmap including best practices, pedagogies for teaching, and implications for research in these areas. It covers elements of content strategy as diverse as "Editing Content for Global Reuse" and "Teaching Content Strategy to Graduate Students with Real Clients," while giving equal weight to professional best practices and to pedagogy for content strategy. This book is an essential resource for professionals, students, and scholars throughout the field of technical communication.

By combining research sources with an annotated bibliography this reference title locates the sources that offer practical solutions to business and technical communication problems.
