Over the past few years a remarkably rapid evolution in the professional level of neonatology and in the survival of immature infants has been witnessed. Persisting ductus arteriosus is common in this population and is associated with impaired longterm outcome. Many uncertainties exist concerning indication, approach, best time, and side effects of necessary measurements and interventions to avoid later neurodevelopmental handicaps of the survivors. Experts in neonatology and pediatric cardiology give their opinion in this book. We are sure it will help to define the level of evidence and to develop standards of intervention for persisting ductus arteriosus in Europe. Adequate dealing with the ductus will become a challenge for every perinatal center.

This book sets out the psychological basis of musical development in children and adults. The study has two major objectives: to review the research findings, theories and methodologies relevant to the developmental study of music; and to offer a framework

within which these can be organised so as to pave the way for future research. It describes the relationship between thinking and music, and discusses the relationship between thinking and music in pre-schoolers and schoolchildren in areas such as singing, aesthetic appreciation, rhythmic and melodic development, and the acquisition of harmony and tonality. The book describes the development of musical taste, and discusses the questions of musical creativity, and of the social psychology of musical taste and fashion. As a comprehensive study of the links between developmental psychology and music education, Hargreaves' work demonstrates the practical and theoretical importance of psychological research on the process underlying children's musical perception, cognition and performance.

For many clients, group therapy is a more practical treatment option than one-on-one therapy sessions. The financial cost of group therapy is substantially less than individual therapy, and research shows it can be just as effective. However, group therapy also presents unique challenges, and is often more difficult to administer. That's why professionals need a solid plan of action when using group therapy to treat clients. In recent years, acceptance and commitment therapy (ACT) has gained immense popularity.

Based in values, mindfulness, and committed action, this therapeutic model has proven successful in treating a number of psychiatric disorders, including anxiety, depression, stress, addictions, eating disorders, trauma, and relationship problems. However, despite the popularity of this modality, there are very limited resources available when it comes to applying ACT in a group setting. Learning ACT for Group Treatment is a comprehensive, powerful manual for clinicians, therapists, and counselors looking to implement ACT in group therapy with clients. A composite of stand-alone sessions, the book provides detailed explanations of each of the core ACT processes, printable worksheets, tips on group session formatting, and a wide range of activities that foster willingness, cooperation, and connection among participants. In the book, professionals will see how the benefits of ACT can actually be enhanced in a group setting, particularly because there are more participants for ACT exercises. This leads to increased accountability among clients, and allows them to play both an active role and the role of the observer during treatment. The book also includes concrete tips for applying ACT to a number of treatment scenarios, including inpatient group therapy, partial hospitalization programs, outpatient programs, and community self-help groups. With detailed exercises and group activities,

this book has everything therapists need to start using ACT in group settings right away.

"This is the fifth edition of the NPAAC requirements for the retention of laboratory records and diagnostic materials. This edition is substantially the same as the fourth edition, with only minor amendments to the fourth edition. Since the publication of the third edition, there have been significant developments in Australian laboratory practice. For example, all pathology laboratories are now required to maintain a formal quality system, and must be accredited to ISO 15189 (AS4633). In addition, new privacy principles and legislation have come into effect, legislation has clarified the status of retained human parts and tissues, and the Human Genetics Advisory Commission (HGAC) has been formed. To address these developments, NPAAC has completely revised the requirements for retention, and has adopted guiding principles to create a uniform and integrated approach to retention requirements."--Introduction, p. 1.

The Airbus A380 is the world's most recognised and most talked about airliner since the Boeing 747 and Concorde appeared in the skies in the late 1960s. Designed to challenge Boeing's monopoly in the large-

aircraft market, it made its first flight in April 2005, entering commercial service two years later with Singapore Airlines. This jet has become so popular that every four minutes--24 hours a day, seven days a week--an A380 is taking off or landing somewhere in the world. There is no other development in recent aviation history to rival this remarkable aircraft.

Beyond Today Magazine -- September/October 2019 -- Mankind has long dreamed of a peaceful planet—a utopian earth no longer plagued by war, unrest, poverty, disease and corrupt government. But in spite of our best efforts, man has never been able to create lasting peace. The problem is that our problems are spiritual and they need a spiritual solution. And God has a plan to bring that about! In this issue of Beyond Today magazine, we show how a paradise on earth will come about—a kind of heaven on earth! Inside this issue -- When Heaven Comes to Earth -- What Heaven on Earth Will Be Like -- Paradise Found! A Feast for the Ages -- How to Enter the Kingdom of God -- Yearning for God's Kingdom Helps Us Now -- "As in the Days of Noah" – Revisited -- Follow Me: The Probing of the Master Prober -- Current Events and Trends -- Letters From Our Readers
