The Design of Sites: Patterns for Creating Winning Web ...

Web design patterns make up a language that you can use in your daily work. In fact, though you may not know it, you may already be using some form of pattern language to articulate and communicate your designs. The patterns might reflect your own experiences using the Web. You might have picked them up from another site. They could even come from an

The design of sites; patterns for creating winning web ...
Patterns are a useful resource for website design. Filling the background with a full-blown image is no longer a useful solution today as the variety of devices and screen resolutions in the market make it difficult to adapt to them all, although it is true that the latest plugins and scripts offer solutions such as automatic image resizing.

Background Pattern Designs And Resources For Websites
Design patterns are quite often created for and used by OOP Languages, like Java, in which most of the examples from here on will be written. Types of design patterns There are about 26
