Decision making mechanisms
that we observe in the
biological world are the
result of biological
evolution. Because of

File Type PDF The Evolution Of Decision

natural selection, genes that cause organisms to be able to survive and leave many offspring will become common in a population.

Evolution of decision making - FutureLearn

One of the most prominent framing effects is the tendency for decision makers to evaluate gambles relative to a reference point, and to act risk-seeking when prospects are framed as losses but risk-averse when identical prospects are framed as gains. This tendency for risk-preferences to reverse between loss and gain frames has been termed the

File Type PDF The Evolution Of Decision

reflection effect, and is one of the primary predictions of Prospect Theory.
