The Man Who Mistook His Wife for a Hat and Other Clinical Tales is a 1985 book by neurologist Oliver Sacks describing the case histories of some of his patients. Sacks chose the title of the book from the case study of one of his patients who has visual agnosia, a neurological condition that leaves him unable to recognize faces and objects. The book became the basis of an opera of the same name by Michael Nyman, which premiered in 1986. The book comprises twenty-four essays split into four secti

The Man Who Mistook His Wife for a Hat Picador Classic ...
When Oliver Sacks was twelve years old, a perceptive schoolmaster wrote in his report: "Sacks will go far, if he does not go too far". Oliver Sacks's autobiography, On the Move which was published before his death in 2015, makes it abundantly clear that Sacks has never stopped going. In his most extraordinary book, The Man Who Mistook His Wife for a Hat, Oliver Sacks recounts the stories of patients lost in the bizarre, apparently inescapable world of neurological disorders.

The Man Who Mistook His Wife for a Hat by Oliver Sacks ...
Oliver Sacks 's The Man Who Mistook His Wife for a Hat is divided into four parts, each of which consists of a series of brief case studies centered around some aspect of neurology, the field of science that deals with the nervous system. In Part One, Sacks discusses neurological disorders that can be construed as deficits in an ordinary function of the brain.

The Man Who Mistook His Wife for a Hat by Oliver Sacks ...
The Man Who Mistook His Wife for a Hat is a one-act chamber opera by Michael Nyman to an English-language libretto by Christopher Rawlence, adapted from the case study of the same name by Oliver Sacks by Nyman, Rawlence, and Michael Morris. It was first performed at the Institute of Contemporary Arts, London, on 27 October 1986. The minimalist score makes use of songs by Robert Schumann, in particular, "Ich grolle nicht" from Dichterliebe, in which Dr. S. accompanies Dr. P., singing the ossia as

By Oliver Sacks. In his most extraordinary book, The Man Who Mistook His Wife for a Hat, Oliver Sacks recounts the stories of patients lost in the bizarre, apparently inescapable world of neurological disorders. These are case studies of people who have lost their memories and with them the greater part of their pasts; who are no longer able to recognize people or common objects; whose limbs have become alien; who are afflicted and yet are gifted with uncanny artistic or mathematical talents.
