Lab Introduction: When an object is dragged across a horizontal surface, the force of friction that F_f must be overcome depends on the normal force as f and the normal force F_N is given by n . When the surface becomes an inclined plane, the normal force changes and when the normal force changes, so does the friction. In this

Molecule Polarity PhET Lab A study of electronegativity, bond polarity, and molecular polarity Introduction: In this atomic-level simulation, you will investigate how atoms' electronegativity value affects the bonds they produce. When two atoms bond, a pair of electrons is shared between atoms. Electronegativity is a measure of a
