It was Melanie Klein, one of the greatest of Freud's disciples, whose pioneering investigations illuminated the baby's most primitive fantasies. The small baby, dominated by overpowering feelings of love and hate towards the mother, projects them outwards and introjects what it perceives of her, Overwhelmed, it splits itself and its mother into Good and Bad.

Gathers writings by the Viennese psychoanalyst concerning infant analysis, Oedipal conflicts, anxiety situations, symbol formation, and envy.

Parker systematically reviews the key psychoanalytic theories to reveal social processes and their significance to modern life: Freud and object relations theory is directed towards group processes, religion and war; the Frankfurt School is used to examine modern individuality, authoritarianism and changes in culture; and the Lacanian tradition to account for language, representation and self-improvement. The theoretical analysis incorporates throughout the volume the work of key figures ranging from Adorno, Habermas and Fromm to Klein, Kristeva, Winnicott and Zizek.

That childhood is a social construction is understood both by social scientists and in society generally. The authors of this book examine the political issues surrounding childhood, including law making, social policy, government provisions and political activism.; This text examines current social and political issues involving childhood. It looks at the impact of the "New Right" who talk of family values, parent power in schools, irresponsible provision of contraception to young girls and the increase in child violence as a result of mass media. It also considers the response of the caring professions and the "Modern Left" who campaign, amongst other things, for the establishment of children's rights.

Imagine you learn that your lover has had you erased from their memory and, in a moment of despair, you have your lover erased from your memory too. Imagine that as you lose your recollections of the bad times together, you realise that you don't want to forget them after all. That's the premise for Charlie Kaufman's Oscar-winning script for Eternal Sunshine of the Spotless Mind. An instant cult classic, the film's distinctive ambiguity and tangled narrative demands audience engagement and repeated watching. Delving into the central themes of the film, Andrew M. Butler foregrounds its play with genre and audience expectations, its psychoanalytic underpinnings and its debt to Philip K. Dick. Also examining its production processes, Butler explores the against-type casting of Jim Carrey and Kate Winslet in lead roles and the intertwined careers of Kaufman and director Michel Gondry. This special edition features original cover artwork by Patricia Derks.

Why do children play? What can children learn from playing? What have psychologists learned from 150 years of studying play – usually a bit too seriously? The Development of Play explores the central role of play in childhood development. David Cohen examines how children play with objects, with language, and most importantly with each other and their parents. He explains how play enables children to learn how to move, think, speak and imagine, as well as to develop emotionally and socially. Incorporating much of the recent research in this area, including that of John Flavell, Henry Wellman and others, The Development of Play shows how play encourages children to grasp the difference between appearance and reality. This new edition updates and builds on the previous two editions, to include new research on pretending and the theory of mind, autism and how parents can play creatively with their children. Play therapy, the history of play and how play is dealt with in the media are also covered. The book addresses the often ignored subject of adult games and why adults sometimes find it difficult to play. The Development of Play offers a fascinating review of the importance of play in all our lives.

Dennis Potter is the most well-known, respected and controversial television dramatist Britain has ever produced. Plays and serials such as The Singing Detective and Pennies From Heaven received huge critical acclaim whilst always attracting audiences in their millions. This book will critically analyse both the strengths and the weaknesses of Potter's oeuvre, whilst investigating his status as both an 'author' and a 'celebrity'. Re-examining the drama, it foregrounds its ambiguities and contradictions, whilst clarifying the complex mixture of themes, styles and techniques that produced its distinctive and often provocative appeal.

Why do children play and why do they stop playing? David Cohen's book answers these questions in light of recent research. Psychologists argue that children play to learn how to move, how to speak, how to think, how to cope emotionally, how to be imaginative, and how to interact with other people. David Cohen suggests that we need to look at the origins of play in the family, and examine how children play with objects, language, and with each other and their parents. "An excellent critical appraisal of research on play. Cohen offers a refreshing open perspective, although he acknowledges that we seem to need a serious reason for play in order to justify studying it...Very readable and entertaining." —Choice

Offers a broad introduction to critical psychology and explores the socio-political contexts of post-apartheid South Africa. This title expands on the theoretical resources usually referred to in the field of critical psychology by providing substantive discussions on Black Consciousness, Post-colonialism and Africanist forms of critique.

Space has emerged in recent years as a radical category in a range of related disciplines across the humanities. Of the many possible applications of this new interest, some of the most exciting and challenging have addressed the issue of domestic architecture and its function as a space for both the dramatisation and the negotiation of a cluster of highly salient issues concerning, amongst other things, belonging and exclusion, fear and desire, identity and difference. Our House is a cross-disciplinary collection of essays taking as its focus both the prospect and the possibility of ' the house ' . This latter term is taken in its broadest possible resonance, encompassing everything from the great houses so beloved of nineteenth-century English novelists to the caravans and mobile homes of the latterday travelling community, and all points in between. The essays are written by a combination of established and emerging scholars, working in a variety of scholarly disciplines, including literary criticism, sociology, cultural studies, history, popular music, and architecture. No specific school or theory predominates, although the work of two key figures – Gaston Bachelard and Martin Heidegger – is engaged throughout. This collection engages with a number of key issues raised by the increasingly troubled relationship between the cultural (built) and natural environments in the contemporary world.
