The Porsche 997 manual gearbox is a 6-speed gearbox. The manual gearbox is the first hand choice by many people who want to attend occasional track activities. The Tiptronic gearbox has a small lag when shifting gears that the manual gearbox doesn't have. With the manual gearbox, it is entirely up to the driver how fast the gears can be changed.

Tiptronic can be shifted like a manual and it is a wonderful Porsche-patented invention, but sticking a fluid-filled torque converter between the engine and gearbox does blunt the experience. It feels wonderfully smooth when Alpine touring with the mrs or carrying the kids around, but when you're on your own and looking for fun, a manual gearbox will do it better.

The Battle Between Manual and Automatic Transmissions

A Tiptronic (or Sportmatic, or Steptronic, or any number of marketing names for it) is a type of automatic transmission that allows the driver to shift gears as they would with a manual transmission. It's different from a computer controlled manual transmission in that it does allow automatic shifting, uses a torque converter instead of a clutch, and the driver doesn't have full control over which gear the car is in.

The benefit of having a Tiptronic transmission system is being able to switch to manual mode, giving you more control when needed. For example, when needing to go up or down a steep hill, you can manually change gear to allow for a smoother, safer drive. Most drivers also report loving the authentic feel that the Tiptronic transmission offers.
