~~U.S. EPA removes requirement for curbing toxic air pollutants~~

The Environmental Protection Agency (EPA) has reversed a Clinton administration-era policy that required major US sources of hazardous air pollutants, such as arsenic and lead, to maintain pollution control technology throughout the lifetime of their operation. The agency finalised its 2018 proposal to reverse the 1995 'once in, always in' policy. This enclosed so-called maximum achievable control technology standards for major pollution sources such as industrial plants and refineries ...

~~US EPA removes requirement for curbing toxic air pollutants~~

One of the most prominent air pollutants, this reddish-brown toxic gas has a characteristic sharp, biting odor. Carbon monoxide (CO) – CO is a colorless, odorless, toxic gas. It is a product of combustion of fuel such as natural gas, coal or wood. Vehicular exhaust contributes to the majority of carbon monoxide let into our atmosphere.

Most countries including the US and the EU have legal limits for the most harmful air pollutants, including PM2.5, NOx, carbon monoxide and sulphur dioxide. But no similar regulatory limits exist...

~~The toxic killers in our air too small to see—BBC Future~~

Toxic air pollutants are poisonous substances in the air that come from natural sources (for example, radon gas coming up from the ground) or from manmade sources (for example, chemical compounds given off by factory smokestacks) and can harm the environment or your health. Inhaling (or breathing) toxic air pollutants can increase your chances of experiencing health problems.

~~Risk Assessment for Toxic Air Pollutants: A Citizen's ...~~

Toxic air pollutants. A large number of chemicals that are known or suspected to cause cancer. Some important pollutants in this category include arsenic, asbestos, benzene, and dioxin. Each toxic air pollutant comes from a slightly different source, but many are created in chemical plants or are emitted when fossil fuels are burned.

~~Major Air Pollutants—InfoPlease~~

Air Pollution in Delhi: A layer of pungent haze shrouded the national capital and smudged landmarks from view on Wednesday, as people complained of itchy throat and watery eyes. Unfavourable meteorological conditions -- calm winds and low temperatures -- caused the air quality to be in the "severe" category. Get more India News and Business News on Zee Business.
