Toyota Production System. Maximising production efficiency through the elimination of waste. The way we make vehicles is defined by the Toyota Production System (TPS). It is an original manufacturing philosophy that aims to eliminate waste and achieve the best possible efficiency – what is often called a “ lean ” or “ just-in-time ” system. The way we make vehicles is defined by the Toyota Production System (TPS).

The Toyota Production System (TPS), which is based on the philosophy of the complete elimination of all waste in pursuit of the most efficient methods, has roots tracing back to Sakichi Toyoda's automatic loom. TPS has evolved through many years of trial and error to improve efficiency based on the Just-in-Time concept developed by Kiichiro Toyoda, the founder (and second president) of Toyota Motor Corporation.

This production control system has been established based on many years of continuous improvements, with the objective of “ making the vehicles ordered by customers in the quickest and most efficient way, in order to deliver the vehicles as quickly as possible ” . The Toyota Production System (TPS) was established based on two concepts: the first is called “ jidoka ” (which can be loosely translated as “ automation with a human touch ”) which means that when a problem occurs, the ...

~~Toyota Production System Tps Freeleansite~~

The Toyota Production System is an integrated socio-technical system, developed by Toyota, that comprises its management philosophy and practices. The TPS is a management system that organizes manufacturing and logistics for the automobile manufacturer, including interaction with suppliers and customers. The system is a major precursor of the more generic "lean manufacturing". Taiichi Ohno and Eiji Toyoda, Japanese industrial engineers, developed the system between 1948 and 1975. Originally call

~~Introduction to the Toyota Production System (TPS)~~

Toyota Production System (TPS), originally called “ Just-in-Time

production ” , was developed by Toyota to organize their

manufacturing operations including logistics, supplier management,

up to customer delivery. Its basic concept is the reduction of cost

through elimination of waste and optimization of machine and human capabilities.

~~The Toyota Production System (TPS) | Kanban Zone~~

Although the Toyota Production System (TPS) was originally

developed by Toyota Motor Corporation it has now been adopted by

many other companies, both in Japan and around the world. As the

core element of the TPS, the Just-in-time (JIT) manufacturing system

has had many books written about it however, there is more to

successfully implementing JIT than simply studying the system itself.
