From the Financial Times's global finance correspondent, the incredible true story of the iconoclastic geeks who defied conventional wisdom and endured Wall Street's scorn to launch the index fund revolution, democratizing investing and saving hundreds of billions of dollars in fees that would have otherwise lined fat cats' pockets. Fifty years ago, the Manhattan Project of money management was quietly assembled in the financial industry's backwaters, unified by the heretical idea that even many of the world's finest investors couldn't beat the market in the long run. The motley crew of nerds—including economist wunderkind Gene Fama, humiliated industry executive Jack Bogle, bull-headed and computer-obsessive John McQuown, and avuncular former WWII submariner Nate Most—succeeded beyond their wildest dreams. Passive investing now accounts for more than \$20 trillion, equal to the entire gross domestic product of the US, and is today a force reshaping markets, finance and even capitalism itself in myriad subtle but pivotal ways. Yet even some fans of index funds and ETFs are growing perturbed that their swelling heft is destabilizing markets, wrecking the investment industry and leading to an unwelcome concentration of power in fewer and fewer hands. In Trillions, Financial Times journalist Robin Wigglesworth unveils the vivid secret history of an invention Wall Street wishes was never created, bringing to life the characters behind its birth, growth, and evolution into a world-conquering phenomenon. This engrossing narrative is essential reading for anyone who wants to understand modern finance—and one of the most pressing financial uncertainties of our time.

A Wall Street Journal reporter evaluates the cost and consequences of high-speed trading, arguing that the development of automatic, super-intelligent trading machines is eliminating necessary human interests and compromising regulation measures. 50,000 first printing.

At its basest form, owning a stock is not much more than owning a piece of company where the stock originated from. You become a holder of equity when you buy into a stock. This generically means that you will do well if the prospects of the company do well. Similarly, if the company takes a downturn, then your stock value will then probably depreciate. You will realize or discover many things if you just stop and ponder a little deeper for a bit. Everyone loves to have the example of Apple stock, but maybe a lesser-known name like Keurig Dr. Pepper may draw a bit of your attention. This stock is what most investment folks' term as a consumer staple stock. When you break down that \$50-dollar word, consumer means folks like you and I, while staple means you really can't do without it for any extended period of time. Things like foodstuff, drinks, as well cleaning items will come into mind when we talk about this. Key to this is also the fact that staples tend to get purchased consistently. If you love doughnuts, and Krispy Kreme is one of your top choices, you just might have known about Keurig if you thought about it and dug a little deeper. What I am getting at is this. There are many stocks out there, as there are many investment opportunities. Not all of these money-making stocks are known only to the top analysts and hot shot investors. Many have household brands in their stables and we just have to dig a little deeper into the things we use, the things we like, and we just might be able to find a potential winner. Anyways I can go on and on talking about Stock Market and Forex Trading. Learn with us so that we can help you with your plans for the future. So, why don't we get started? Have you ever heard the word "investing" before, but you have never understood what it really means? It's actually quite simple—it means making your money work while you do what you want. Basically, it's a different way of thinking about how to make money. While growing up, most of us have been taught that we can only earn an income by finding a good job—and that's exactly what most of us do. However, there is a big problem with this—if you want more money, you have to work longer hours. However, there is a limit to the number of hours a day we can work on—not to mention the fact that having a lot of money is not fun if we do not have the time to enjoy it. This is why rich people do not have a job—they have businesses that work for them. Think about it—you have a job that allows you to earn over 2000 dollars a month, but that takes you over 13 hours a day, 6 days out of 7, so about 11 remain—and usually, the hours of sleep should be at least 7 – 8 (for a healthy lifestyle). Considering also the displacements and the time lost to go to work, you have 3 to 4 hours left, where you most likely will use 2 for dinner in the evening. In the end, there are 2 actual hours of time per day, which do not allow you to enjoy life to the fullest. You will find yourself having a 2000-dollars-a-month salary (which, nowadays, is nothing) that will continue to accumulate, as you will not absolutely enjoy them in any way. This is what is often called the "rat race." Is there a solution? Yes, it exists, and it is to take part of your money and invest it properly in the financial markets. By doing so, you are letting it work for you. The possibilities are scary and extremely profitable. Do you want one example? Take a look at Apple's stocks. Apple's stocks have risen at a frightening rate in the last 10 years, from \$10 to about \$100. This means that with an investment of only \$ 1,000, you would now have over 10 thousand dollars. This is the power of online investing—it allows you to grow your money in a totally automatic way. Unfortunately, there is no duplication of self to increase the time at work, but instead, you can create an "extension" of yourself—that is, your money—and put it to work. In this way, while you are working for your employer, or while you are at the bar with friends, you can still earn at the same time—thanks to the investment you made. In a very simple way, therefore, you can make your money useful, thus maximizing your earning potential, even if you do not receive an increase in your pay, or even if you do not decide to make an extraordinary one, or you are looking for a more remunerative job. There are many ways to do this. This includes investing your money in stocks, bonds, mutual funds, forex, CFDs or real estate (and many other things), or even starting your own online business (like affiliate marketing). Sometimes, people refer to these options as "investment vehicles," which is just another way of saying "a way of investing."

Jeffrey Hirsch discusses how to capture market-beating returns by following specific stock market cycles While predicting the direction of the stock market at any given point is difficult, it's a fact that the market exhibits well-defined and sometimes predictable patterns. While cycles do not repeat exactly all of the time, statistical evidence suggests that cyclical tendencies are very strong and should not be ignored by investors. The Little Book of Stock Market Cycles will show you how to profit from these recurring stock market patterns and cycles. Written by Jeffrey Hirsch, President of the Hirsch Organization and Editor-in-Chief of the Stock Trader's Almanac, this reliable resource explains why these cycles occur, provides the historical evidence behind them, and shows you how to capture consistent profits from them moving forward. In addition to describing his most widely followed cycles and patters, Hirsch also discusses both longer term boom-bust economic cycles and shorter term tendencies involving the best days, weeks, and months of the year to trade the market. The methods found here follow everything from presidential election cycles to the "Santa Claus" effect Written by Jeffrey Hirsch, the pre-eminent authority on market cycles and seasonal
