Reference guide to the Indian transfer pricing laws and method. The book provides comprehensive coverage and practical guidance on transfer pricing issues, including an analysis of the Indian legislation and transfer pricing methods; documentation requirements; a comparison of the Indian legislation with the OECD guidelines; tax planning techniques related to transfer pricing; discussions of the transfer pricing regime in Australia, Canada, China, France, Germany, Japan, Singapore, the United Kingdom and the United States. Furthermore, it contains brief overviews of the transfer pricing regime in 18 other countries; and the OECD transfer pricing guidelines for multinational enterprises and tax administrations (July 1995).

The article analyses the economic and financial impact of COVID-19 on transfer pricing aspects of intercompany financial transactions - particularly loans, borrowings and guarantees - from an Indian perspective, taking into account the fiscal measures adopted by the government and the Reserve Bank of India.

This book covers all major topics in international tax law, ranging from permanent establishments and capital gains to the taxation of royalties and technical services, transfer pricing, and General Anti-Avoidance Legislation. It also highlights the Indian " story " of status vs. contract by examining four areas of controversy: permanent establishments, FTS (Fees for Technical Services) & Royalty, capital gains, and transfer pricing. The book approaches the subject of international taxation from two opposing yet related perspectives. One is the tax planning perspective, which involves contracts entered into by individuals and companies; the other is that of state regulation through increasingly complex legislation. The area of permanent establishments demonstrates the dominance of contracts over status, at least with respect to Indian tax law. However, some recent judicial decisions in this area demonstrate the susceptibility of contracts to status-related arguments. The areas of FTS & Royalty as well as those of capital gains and transfer pricing demonstrate the Indian government ' s attempts to establish, through legislation, the dominance of status over contracts. Whereas traditional textbooks on international tax law focus on the legal technicalities of tax legislation, this book provides tax scholars and lawyers with an understanding of tax planning and tax legislation side by side in each chapter, specifying the respective kind of actual or anticipated tax planning activity that in turn prompted a legislative response. As such, it offers readers a contextual and practical introduction to the complexities of international tax law, as well as an in-depth analysis of the latest debates and controversies in this area.

This book explores transfer pricing issues related to intra-group financing transactions. It is an invaluable resource for tax practitioners, tax lawyers, tax managers, tax directors of corporations, treasurers and tax authorities, in all facets of transfer pricing and intra-group financing.

Via a global analysis of more than 180 transfer pricing cases from 20 representative jurisdictions, Resolving Transfer Pricing Disputes explains how the law on transfer pricing operates in practice and examines how disputes between taxpayers and tax administrations are dealt with around the world. It has been designed to be an essential complement to the OECD Transfer Pricing Guidelines for Multinational Enterprises and Tax Administrations, which focus on transfer pricing issues but do not refer to specific transfer pricing disputes. All of the transfer pricing cases discussed in the book are linked to the relevant paragraphs of the OECD Guidelines by means of a 'Golden Bridge', namely a table listing the cases according to the paragraphs of the Guidelines to which they refer. It therefore provides examples of the application of the Arm's Length Principle in many settings on all continents.

About the book The growing importance of the intangible assets in the global economy coupled with expanding international intra-firm trade, has meant that transfer pricing issues concerning intangibles have assumed critical importance for both the Multi National Enterprises as well as Tax authorities. The identification, accounting & valuation of intangibles is a challenging and evolving field. This volume details the various such issues and concerns from both industry and revenue perspective. Further, the contemporary issues of digital economy, tax planning, BEPS, GAAR have also been extensively dealt with. Key features - Explains in detail the meaning of various types of intangibles as defined in Income Tax Act. - Discusses the various possible methodologies for valuing the intangibles including the typical and residual methods - Accounts for all the relevant changes suggested by the OECD in the BEPS Action Point 8-10 report regarding intangibles - Valuation of Highly Uncertain as well Hard-to-Value Intangibles - Relevant Features of and taxation challenges posed by Digital economy - Various possible techniques of Tax Planning adopted by the Multi-national Enterprises - All the BEPS Action Point Reports along with recommendations as adopted globally as well as in India including Thin Capitalisation, PoEM, Equalisation Levy, amended DTAAs with Mauritius, Cyprus & Singapore (Updated upto Finance Bill, 2017 (India)) - Transfer Pricing Aspects of CCAs, Intra-group Services & Business Restructuring including issue of indirect transfers - Discussion on General Anti Avoidance Rules, to be implemented in India from 01/04/2017 - Famous and important global and Indian case laws with regard to intangibles - Detailed discussion on issue of AMP expenses & marketing intangibles

Contributed articles at two workshops.
