Global economic activity -

Demand for crude oil is
closely linked to global
economic activity. Growth in
GDP drives demand for oil
and leads to an increase in
crude oil prices.

The major components of UK petrol and diesel prices are the product costs, fuel duty and Value Added Tax (VAT).

Changes in these components will affect the price that customers pay at the pump.

Taxes - Total taxes typically account for around 59% of average UK fuel pump prices in 2013. However, the proportion of total taxes within the pump price has

UK Fuel Market Review The
number of UK petrol stations
has been declining at a
steady pace since the late
1960s. This is due to a
variety of reasons. Fuel
retailing is a high fixed
cost, low margin business
where high volumes are
required to break even.
