neutral rates which apply to most commodities in States goes up to 15%. The lower rate of 2% is available against Form C which can be issued by specified persons (resellers, manufacturers, processors etc) and cannot be issued by consumers. The State VAT laws have been in place since 2003. The payment of tax, filing of returns, assessment, reassessment etc under CST are all as per the local VAT laws which are ever changing and quite draconian. The quality of the administrators in general also leaves a lot to be desired. There are many disputes and demands for differential taxes from VAT departments in

most states for wrong issuance of C Form in situations where goods were not permitted to be procured against Form C. GST would be in place by April 2017 if all goes well.

However, CST law is expected to continue as a parallel levy at 1% after 1st April 2017 for a couple of years. This could lead to CST continuing to be non-vattable even under GST regime and an add-on to costs incurred by the dealers. In this book we have covered important concepts, case laws and possible dispute areas along with resolution. The movement of goods on stock transfer basis, subsequent sale, sale in course of import and

Services Tax, under the acronym GST in a number of OECD countries) has become a major source of revenue for governments around the world. Some 165 countries operated a VAT at the time of the completion of the International VAT/GST Guidelines in 2016, more than twice as many as 25 years before. As VAT continued to spread across the world, international trade in goods and services has also expanded rapidly in an increasingly globalised economy. One consequence of these developments has been the greater interaction between VAT systems, along with growing risks of double taxation and unintended non-

taxation in the absence of international VAT co-ordination. The International VAT/GST Guidelines now present a set of internationally agreed standards and recommended approaches to address the issues that arise from the uncoordinated application of national VAT systems in the context of international trade. They focus in particular on trade in services and intangibles, which poses increasingly important challenges for the design and operation of VAT systems worldwide. They notably include the recommended principles and mechanisms to address the challenges for the collection of
