Veritas NetBackup's made our shortlist because it offered hardware-level replication and seamless VMware integration. But it was the functionality-to-price ratio, and its top industry ranking that convinced us Veritas would be a solid partner for our business continuity. - Ivaylo Dekov, Director of Infrastructure, BORICA AD

Hi All, How to use specific media server for backup in Netbackup. We have 4 media servers. the one which is in use now is not reachable. I tried to change media server but by default it is taking default one. Can anyone help me how to force another media server to use for backup? Thanks in advance.

This IBM® Redbooks® publication describes the new features that have been added with the release of the IBM System Storage® SAN Volume Controller (SVC) and IBM System Storage Storwize® V7000 6.4.0 code, including Replication Family Services. Replication Family Services refers to the various copy services available on the SVC and Storwize V7000 including IBM FlashCopy®, Metro Mirror and Global Mirror, Global Mirror with Change Volumes, Volume Mirroring, and Stretched Cluster Volume Mirroring. The details behind the theory and practice of these services are examined, and SAN design suggestions and troubleshooting tips are provided. Planning requirements, automating copy services processed, and fabric design are explained. Multiple examples including implementation and server integration are included, along with a discussion of software solutions and services that are based on Replication Family Services. This book is intended for use by pre-sales and post-
